📍 Corso Vinzaglio 33/A  
10121 Torino (TO) Italy

Future-focused, experienced in international working environments, aiming to work in **science-communication**, particularly in the **nuclear industry** and in lobbying for **clean and environmentally friendly nuclear power**.

## LANGUAGE SKILLS

## PROFESSIONAL EXPERIENCE

🕒 09/2020 - Present

### Professor of Mathematics and Physics

L.S.S. Ettore Majorana, Torino (TO)

I.S.S. Curie-Vittorini, Grugliasco (TO)

🕒 09/2017 - 06/2020

### Professor of Mathematics and Physics

Lindbergh Academy, Rivoli (TO)

I used to teach math and physics to young students who train to become pilots, with a particular focus on trigonometry (route calculation) and dynamics of flight.

🕒 06/2012 - 01/2022

### Journalist

Tagli Magazine, Torino (TO)

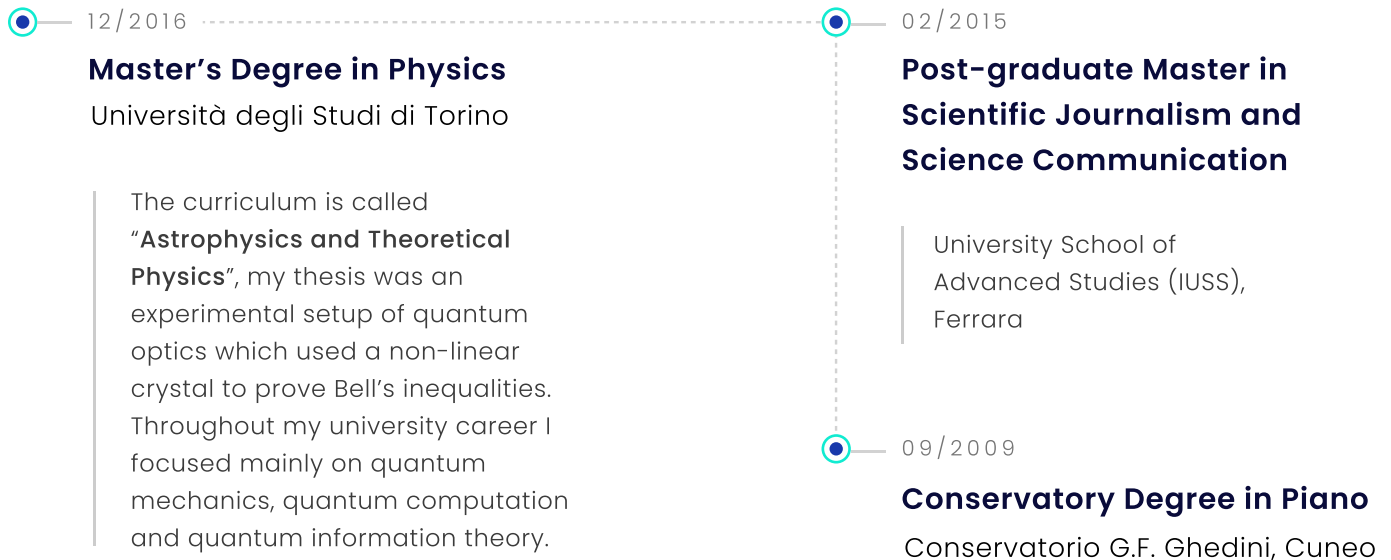

🕒 10/2010 - On Hold

### Event Manager and Judge

Channel-Fireball Events & Others, Worldwide

Starting from 2010 I have been working as a Magic - The Gathering judge and event manager, reaching the highest possible certification level in 2016. I worked as an independent contractor and team leader for different tournament organizers in over 20 countries.

## EDUCATION

## HOBBIES AND INTERESTS

### Pro-nuclear Climate Activism

In April 2020 I started a nuclear advocacy and education project on Facebook, in the form of a page called "L'Avvocato dell'Atomo" (The Atom's Advocate/Lawyer), which quickly became the most important and sought-after source of informations about nuclear power for the Italian speaking public. In October 2020 we expanded on Instagram, then also on Twitter, Tiktok and YouTube. Currently, a total of 17 people volunteer for the project, and 15 of them either have or are in pursue of a Master in either Physics or Nuclear Engineering. Currently, l'Avvocato dell'Atomo is the biggest nuclear communication project in the world, totalling more unique followers (above 200k) than any other project of the same kind, despite writing in Italian and not receiving any form of financing.

### Martial Sports

I practiced Aikido for about 12 years, reaching the II Dan level.

### Reading the News

I keep myself informed and engaged on international news, and I am a New York Times subscriber.

### Traveling

Probably my greatest passion; I developed quite a skill in finding the best quality/price combinations of flights to reach the farthest destinations.
